

Running FortiClient iOS

After downloading the FortiClient installer and running the application for the first time, you must acknowledge some popups before continuing to add a VPN configuration. Acknowledge the notifications shown below.

Privacy Policy Highlights

Forticlient DOES NOT collect any user specific personal information like username, photos or email address.

Analytics

FortiClient Application may collect some anonymous usage information and send to Fortinet for App enhancements & usability improvements.

VPN

FortiClient Application does not monitor user's VPN traffic.

WebFilter

FortiClient webfilter feature, if enabled, submits website urls to Fortinet servers for category rating.

By selecting "I accept" below, you agree to FortiClient Apps [Terms of Service](#) and [Privacy Policy](#).

I accept

FortiClient

The FortiClient App has been upgraded to support the following new features:

* Tunnel mode SSLVPN

* WebFilter
(now supports all browsers)

OK, got it

To add a VPN connection:

1. In the *Add VPN Configurations* popup, tap *Allow*.

2. Tap the *VPN* icon at the bottom of the screen to switch to the VPN page.
3. Tap *Connections > Edit > Add Configuration*, then configure the following. Enter your passcode to confirm adding the VPN.
